### Module Description

The aim of this module is to provide students with the opportunity to demonstrate their ability to apply the knowledge gained in the Master's Degree Program and complete a research project on their own with the assistance of an advisor. In addition, it provides students with the opportunity to explore in depth a topic of interest by applying a rigorous, systematic, and scientific approach to problem solving.

By the end of both modules (ELP701A and ELP702B), students should be able to:

1. Implement an original and methodologically valid research plan.
2. Present and critically analyze their research findings.
3. Present their research in a complete master thesis form.
4. Defend their thesis in the presence of an ad hoc, assigned thesis committee.

This is the first Module of the Master Thesis series.

### Pre-requisite Modules

ELP511	Introduction to organisation and management of education
--------	--

### Co-requisite Modules

ELP512	Applied educational research: Quantitative methods
--------	--
